## Admission Requirements

(In years as established by the college)

A high school diploma with the following specific courses:

- 4 English
- 2 Algebra I & II
- 1 Geometry
- 1 Senior Math (*recommended*)
- 2 Lab Science (*biology & chemistry or physics*)
- 2 History/Social Studies
- Academic electives (*to equal at least 17 total credits*)

*To ensure current mathematical skills, students should take a mathematics course during their senior year of high school.*

## Major Requirements

### Bachelor of Arts

- 32 credits Biological Sciences (*with emphasis in Zoology courses*)
- 19-30 credits Affiliated Science & Mathematics
- 27 credits Human Values & Social Context

### Bachelor of Science

- 32 credits Biological Sciences (*with emphasis in Zoology courses*)
- 31-33 credits Affiliated Science & Mathematics
- 18 credits Human Values & Social Context

*120 Minimum total credit hours required for graduation*

## College of Natural Sciences, Forestry & Agriculture

### Program Description

The program in Zoology provides a vigorous background in the fundamental aspects of animal biology while allowing flexibility in planning the direction of specialization for student majors. Students plan their program in consultation with a faculty advisor and can select courses from several departments within the college (School of Biology & Ecology, Department of Biochemistry, Microbiology & Molecular Biology, Department of Plant, Soil, and Environmental Sciences, Department of Wildlife Ecology, School of Marine Sciences). The emphasis of student programs can include preparation for the health professions and range from the molecular and cellular levels through development and physiology to the evolutionary and ecological levels.

UMaine offers students many opportunities to participate in research in faculty laboratories. These include student independent research for course credit, research for a capstone or an honors thesis, and paid work. In addition, students can hold a variety of internships off campus. The UMaine Career Center provides many resources to help students find such internships.

### Career Opportunities

There are many opportunities for employment of zoologists at the state and national levels in the health professions, and the fields of education, ecology, and agricultural science. Some of these positions require only a bachelors degree, but many require graduate study at a university or professional school. Opportunities are available in the private sector (health care, biotechnology, consulting), federal and state government (research labs, environmental monitoring), and at the local level (education). Opportunities for research positions exist at research universities around the country, e.g., the University of Maine, at private research laboratories, e.g., the Jackson Laboratory, in private industry, and in state and federal laboratories.

### General Education Requirements\*

- ENG 101 College Composition
- 18 credits Human Values & Social Context area (*a single course may satisfy more than 1 sub-category, but a total of 18 credits must be completed*)
  - Western Cultural Tradition
  - Social Context & Institutions
  - Cultural Diversity & International Perspectives
  - Population & the Environment
  - Artistic & Creative Expression
- 2 courses Designated Writing Intensive (*1 must be within the major*)
- 2 courses Biological or Physical Sciences (*must include at least 1 laboratory course*)
- 1 course Ethics (*emphasis on discussion of ethical issues in 1 course or series of courses*)
- 6 credits Mathematics (*including statistics & some computer science, only 3 credits in computer science can count toward this requirement*)
- 1 capstone An approved experience in which the student integrates the components of his or her undergraduate training to perform at a professional level. The capstone experience is usually completed during the senior year in consultation with the student's academic advisor.

*\*All UMaine students must complete these general education requirements, which are counted in the total credit hours required for graduation and may be contained in the Major Requirements previously listed.*

## **Specialized Information**

The School of Biology & Ecology offers a minor in Zoology. The minor is not open to students majoring in Biology or Botany. The minor requires completion of 22 credit hours including the courses listed below. Students must obtain a minimum grade of C in BIO 100 and BIO 200 and a minimum GPA for the minor of 2.0.

BIO 100 - Basic Biology

BIO 200 - Biology of Organisms

OR

BIO 208 - Anatomy and Physiology

Any courses, at least three of which must be animal courses (A), from Biological Sciences Areas I-V in Biology B.A. and B.S. programs (some restrictions apply to students in AVS, BMB, SMS, or WLE; see catalog).

Note: Students majoring in Botany, Biology or Zoology are not eligible for a second major in one of these fields because of extensive overlap in the requirements for these degrees.

## **Graduate Study**

The School of Biology & Ecology offers a Master of Science degree and a Doctor of Philosophy degree in Zoology. Zoology graduates enter competitive Masters and Doctoral programs, as well as various professional schools—medical, dental, etc.—nationwide.
